

## Alternative speaker box for RW6

The 18 litres speaker box recommended in the user manual for RW6 subwoofer kit is the perfect box for most users. In some kind of vehicles like trucks or others, it can be better to install a box behind a seat or whatever. Here is a box drawing that can be used in such vehicles. The port can be installed on the top of the box instead of at the side.

Use the port coming with the kit  
Box volume: 18 litres  
Material: 19 mm MDF
